- Game Changers
- DHS
- GSA
- Health IT Overview
- HHS
- VA
- Treasury
- Transportation
- USDA
- Justice
- State
- Commerce
- Energy
- IDIQ Outlook

## Insights, Intelligence & Actionable Data

The TechAmerica Foundation Vision Conference CD is available for purchase. The annual TechAmerica Foundation Vision study provides a rich, comprehensive and widely referenced analysis of federal spending and business opportunities for the future. The DoD presentations provide a ten-year outlook for U.S. defense spending, with the Federal IT focusing on agency presentations dedicated to forecasting the next five years of federal civilian information technology spending. This analysis is a "must-have" for strategic planning, market analysis and business development efforts within the federal government marketplace.

## Forecasting the Federal Marketplace Since 1965

The complete Vision CD includes all DoD and Federal IT presentations (with transcripts) that were made during the October 2011 47th Annual Vision Conference. If you are only interested in either the DoD presentations or the Federal IT presentations, you can order a separate CD that includes either of these topics. To order a CD, please refer to the order form on the reverse side or contact Joan Piccariello via email [joanp@techamericafoundation.org](mailto:joanp@techamericafoundation.org) or via phone (703) 284-5314 for assistance.
