

Jordan Becker

**VP/GM
GEOINT-ISR**

Jordan Becker is vice president and general manager of the [Geospatial Intelligence – Intelligence, Surveillance and Reconnaissance \(GEOINT-ISR\)](#) business area within BAE Systems Intelligence & Security. Becker leads the company's efforts to develop, deliver and support systems for the intelligence and C4ISR customer community with an emphasis on information dominance, mission management and mission-focused information technology services.

Becker came to BAE Systems from SAIC, where he was senior vice president and chief technical officer for the Information Technology and Network Services Group, whose customers are in the energy, health and federal civilian markets. Previously, Becker worked at IBM Research for eight years on signal processing algorithms and control systems for scanning tunneling microscopy.

Becker is a member of the Association for Computing Machinery, IEEE and the Internet Society, which guides standards, policy and education. Becker holds a master's degree in electrical engineering from Columbia University.
